

A Neolithic Studies Group day conference

Levelling up the British Neolithic

Saturday May 14th 2022

Free conference on **zoom**: tickets and zoom details can be found [here](#):

A day conference giving a platform for fresh research and fieldwork on aspects of the British Neolithic *beyond Stonehenge*. There is as much interest as ever in Stonehenge, the Stonehenge landscape, and the Neolithic of Wessex. At times this can seem to overshadow sites, research and fieldwork relating to other parts of Britain which is a shame as we know that many other aspects of the British Neolithic are amazing, engaging and significant. This is not about being negative – it is about levelling up the rest of the British Neolithic to the same status Stonehenge and its landscape has. The programme celebrates fresh research & fieldwork results from early career researchers and archaeologists from within and beyond the sector.
